WHY GO ANYWHERE ELSE?

At HTG we have developed add-in packages for you so you know what your cost will be now.

HTG hi-tech home add ins:

AI Package # 1 - Baby and Nanny Cam - Remote internet accessible camera solutions to monitor a room or door.

Installation and setup \$575.00 and up.

AI PACKAGE # 2 - Let the sun shine- This is our economical stand alone drapery opener and wall switch. The unit can be integrated with any stand alone wired lighting package or can be a compliment to any wireless lighting control system. When used with a Hi-tech controller each drapery opener may be automated and controlled. This enables opening or closing of your existing or new drapery or shading system.

There are wireless or wired solutions available.

Installed starting at \$350.00 and up

AI Package # 3 - Can you hear me now - This is a stand alone cellular wireless amplifier that provides cellular coverage in basements or homes where there is poor cellular signal strength. System includes amplifier and antenna for all signals in the 824-894 Mhz and/or 1850-1900 Mhz bands.

(Cingular, Sprint, T-mobile, Verizon, Alltel, Bell Canada and others).

Installed starting at \$950.00 and up

AI Package # 4 - Who Is It- Modern technology blended with the convenience of traditional functionality of what we know as an intercom system. The new intercom systems not only work better than ever, but are aesthetically and architecturally modern enough to be blended into any home decor. System functions include music being played in background, hands free operation, room monitoring, outdoor and patio units and private call functionality.

Four room system starter packages installed starting at \$850.00 and up.

AI Package # 5 - Vroom Vroom/Beep Beep - Installing a simple and convenient driveway alert system allows the ability to inform you that visitors or a vehicle has been detected outside your home. The system will alert you if someone is in your driveway or in front of your walk way outside your front door, this low cost convenience is something to consider .These systems are available in both wireless or wired system and can easily be integrated to work with your hi tech home controller or electric gate opener. The system may also be used as a simple stand alone annunciating system.

Installation and set up.

Wireless: \$300.00 and up

Wired: \$450.00 and up

AI Package # 6 - My Investment Protection- Here is another simple, proactive and highly effective and budget friendly add in for any home with any type of high technology electronic device. With a "whole house electrical surge protection" that will connect to your main electrical panel and/or sub panels. This device has been engineered to absorb voltage surges from electrical disturbances, lightning strikes, or utility company transformer failures. Similar but much more effective than the popular power strips commonly found in today's homes. There are indoor and outdoor enclosures are available to protect all your homes valuable devices, motors, and pumps. Recommended for all hi tech controllers and wired lighting control system installations. Every home should have one of these!

Installed starting at \$375.00 and up

AI PACKAGE # 7 - ITS for My Home- The Information Transport system for my home add in, is a high performance network cable infrastructure engineered to support today's and tomorrows high bandwidth networking, video and TV requirements. Your new network cables will be warranted for 20 years of performance and are installed in a new structured media center. A structured media center will ensure maximum cable performance, network efficiency and cable management for the life of your connected home. Cables in your homes rooms are terminated on high performance RJ45 modular jacks with faceplates that match your homes existing decor. Six room ITS infrastructures starting at \$950.00 and up

AI Package # 8 - My Home Server- This add-in kit includes the setup, installation and configuration of a HP media smart server into your home network. Installing a home server not only centralizes the storage of all your home personal computers and laptops, but also automatically will back up your home PC's daily in case of any computer failure. Everyone in your family will further benefit from the convenience of their newfound ability to securely remotely access their PC from anywhere on the internet. Programs such as I-Tunes and digital media folders can be shared among home PC's. You can networked picture frames as well to be viewed from a family room on a Playstation, Xbox, Wii game console. A windows home server further enhances the benefits of your hi tech home controller by enabling blackberry PDA's and I-Phones to remotely access your connected home as well. Installation, router, and network set up \$950.00 and up.

AI Package # 9 - H20 Detective- The H20 Detective add-in protects your home and valuables from unexpected repairs from water damage. This is a wise and economical choice for homeowners are popular in homes where dishwashers or clothes washers are located above the first floor, in basement areas you may not visit daily, and in vacation homes. This simple system has a loud audible alert similar to a battery powered smoke detector and is powered by your existing electrical wiring. The monitoring range is approximately 150' radius and the sensors can be placed under carpet or area rugs. The H20 detective can work as a standalone system in as many areas of your home or can be added to the hi-tech home controller. This allows additional automation functions like the ability to turn off a water main or calling a phone number when an alarm is activated. Installation starting at \$250.00 and up.

AI Package # 10 - 99 No Ding- The high tech home way for parking your vehicle. Ensure that you park in the same spot every time and eliminate the tripping hazard on the floor. Eye Safe Laser guidance is activated when your vehicle enters the garage and is a great way to maximize space in a multi car garages. Installed \$99
