

Sabbath Sundown

Lighting Control Upgrade

Featuring Vizia RF +™

Problem: Manual control of electricity forbidden on the Sabbath
Solution: Automatic lighting control for the Sabbath

Automate Lights and Electrical Devices

Now there is a genuine solution for automating residential lighting in a convenient way that is respectful of Sabbath observations. Vizia RF + wireless devices offer the ability to automatically control when lights and other selected electrical devices can operate. Simply upgrade standard switches and dimmers to Vizia RF + intelligent devices for a smart system at an affordable cost.

The Solution Is Convenient

The Vizia RF + Sabbath Sundown lighting control kit from Leviton is the ideal solution for managing electricity without manual interaction during observant time periods. Using wireless technology, Vizia RF + transforms selected lighting and electric circuits into controlled lights and appliances that can turn on and off on a customized preset schedule. Easy to install and energy efficient, the wireless devices will be a welcome addition to your home.

Solution Benefits

- Schedules lighting and electronics for the Sabbath
- Provides dusk and dawn astronomical settings that automatically adjust for length of day
- Wireless design simplifies installation hassles
- Offers reliable performance and dependability
- Saves energy by dimming lights
- Speaks Z-Wave®

Installs in most new or previously owned homes

Leviton recommends installation by a professional installer or licensed electrician for optimum performance.

vizia rf +™

Sabbath Sundown Lighting Control Upgrade

The Vizia RF +™ Sabbath Sundown Lighting Control Upgrade will add value and comfort to your home.

This solution requires these components:

Some installations may vary due to previously installed components. Check with a professional installer for specific configuration options.

	Quantity
 <p>RF Handheld Remote Controller Programmer/Timer The controller provides the capability to program the system, group lights into zones, and schedule times when lights will automatically operate. Additional features include scene creation, dusk/dawn astronomical scheduling, room-to-room profiles and more. It includes rechargeable batteries, stand and battery charger. Leviton requires at least 1 device per household. (Cat. No. VRCPG-0SG).</p>	<input type="text"/>
 <p>600W Incandescent Scene Capable Dimmer Energy savings is a benefit of all dimmers, but add remote wireless capability to these attractive wall-mounted dimmers and you've got a powerful piece of technology. For convenience, you can control incandescent outdoor lighting loads by scheduling the power to operate automatically at sundown, or customize different scenes in a room by presetting the lights for a mood or activity. It includes LED locator light so it's easy to find on the wall. Leviton recommends at least 1 device for this application. (Cat. No. VRI06-1L)</p>	<input type="text"/>
 <p>15A Scene Capable Wall Switch More powerful than a regular switch, the scene capable switch provides local and remote control of non-dimming loads, fans and other lighting devices. It is also ideal for use with compact fluorescent bulbs. The sleek appearance of Vizia RF + switches complements any décor. Leviton recommends at least 1 device for this application. (Cat. No. VRS15-1L)</p>	<input type="text"/>
 <p>300W Scene Capable Plug-in Lamp Module Use the Plug-In Lamp Module to include incandescent table lamps and floor lamps as part of a scene. It functions much like an adapter between the lamp cord and a wall outlet. Once programmed by the remote controller, each module allows a lamp to be dimmed and brightened automatically and on a custom schedule. Leviton recommends at least 2 devices for this application. (Cat. No. VRP03-1LW)</p>	<input type="text"/>

Other solutions and options are available to expand and upgrade your system. Ask your installation professional for suggestions.
