

# THE STUDIO COLLECTION

A New World Of Design And Technology

on·Q  

---

legrand

“ The Studio Collection will stir your senses and make personalizing your décor a simple pleasure. Splash into a new world of design and technology and create the perfect canvas for your own sense of style. ”

## WALL PLATE

*Featuring titanium edging and a screwless finish, the Studio design will add a touch of elegance to any room. Use it throughout the house by wrapping any light switch or receptacle in a Studio plate to echo your personal style and taste.*

“ Does white leave you feeling neutral? Add a rich, lustrous finish. Think strong, timeless, versatile. With a monitoring system in sleek Titanium, your powerful sense of style can help you keep an eye on the whole house—and let your confidence shine. ”

## CAMERA

*The Camera System provides a crystal clear, real-time view of up to four areas inside or outside of your home. Discreet, adjustable cameras can display all the action on any TV, over the Internet, or on an LCD—even in low light or nighttime conditions. Each camera also includes a microphone, enabling audio as well as video monitoring.*

“ If you value shades of intrigue and artistic vision over self-reflection,  
trade Titanium for Gloss Black. Daring. Sophisticated. With the ability to  
see through walls, you'll never live in the dark again. ”

## DISPLAY

*The wall-mounted flat panel LCD Console lets you monitor your home and your loved ones from a central location such as the kitchen. It features a 7" full color high resolution LCD screen, as well as integrated speakers for audio monitoring. The sleek console displays crystal clear images from up to four cameras.*

“ Are you a shade more passionate? As vibrant as Valencia, Spanish Red adds warmth and spirit to multi-room audio. Now everyone under your roof can keep their own distinctive beat. The kids can rock out upstairs while you flamenco in the family room. ”

## MULTI-ROOM AUDIO

*The Whole House Audio System delivers high-quality stereo music to every corner of your home, or allows you to plug in your iPod® for personalized music in just one or two rooms. The sleek keypad makes controlling the music in each location as easy as flipping a light switch.*

An aerial photograph of a coastline with clear, turquoise water and dark, jagged rocks. The water is a vibrant greenish-blue, and the rocks are dark and textured. The scene is serene and natural.

“ Looking for an exotic escape every day? Let the cool tones of Cozumel transport you. Immerse yourself in the ease of speaking with those you love, anywhere, anytime. And create a calming, personal retreat, where soothing conversations begin without ever leaving the room. ”

## INTERCOM

*The Selective Call Intercom System keeps each member of your family connected anywhere inside or outside of your home through elegant, wall-mounted units about the size of a light switch. The system includes personalization options such as digital door tones and room names, and is simple to control via the high-resolution screen with easy-to-use navigation.*

# COLORS

## BASIC COLORS

---

Basic is anything but boring. It sets the standard for a cultivated environment.

White
