HAI lighting control™

Elegant, reliable lighting control at an affordable price

Automation Simplified.®

Dim lights as movie begins, using the convenient remote control.

Set the mood for entertaining with the push of a button.

Front door and driveway lights come on at dusk and turn off at a set time to save energy.

Light a pathway to safely exit your home during a fire.

Create a softly lit pathway to the bathroom or kitchen at night when a motion sensor is tripped.

Affordable modular lighting control

With HLC "smart" switches and scene switches you can set elegant lighting scenes for each room, adding as your needs change.

HAI lighting control™

Lighting control can enhance the enjoyment and value of your home, add security for peace of mind, and contribute to savings on your energy bill.

With HAI Lighting Control (HLC) you can experience all of the benefits of a sophisticated lighting control system that is affordable and retrofittable.

There is no need to run new wires as long as you have standard residential wiring (120/240V electrical system with a neutral wire at each switch location). For retrofits or expansion, simply replace the existing light switch with an HAI "smart" switch.

Save Money with HLC

Studies show that dimming a light by just 10% can save 10% of electricity and double the life of the bulb. HAI systems can automatically set lights to 90%, saving you money any time a light is turned on.

Dimmers & Switches

HLC "smart" switches and dimmers are available in as many as 7 different colors and as 600, 1000, 1500, and 2400 watt dimmers, 15 amp relays, and auxiliary switches. (White paddle shown. Wallplate not included.)

House Status Switch

Master lighting control showing the status for eight rooms. The illuminated button indicates that one or more lights in that room are on. Press any button to turn all lights in that room on or off. (Black bezel shown. Wallplate not included.)

Scene Switch

Control all lights in a room or area. Lights can be turned on, off, dimmed, brightened, and set to four different scenes, which are easily set by tapping the scene button 5 times. Can be mounted in Table Top Cradle. Hand held Infra-red remote available. (Black bezel shown. Wallplate not included.)

Lamp & Appliance Modules

Control table lamps and small appliances with HLC plug-in modules.

HLC Matches Your Style!

Most HLC switches and dimmers accommodate standard Decora-style Wallplates, to give you unlimited faceplate options.

LED indicator lights can be programmed to glow Blue, Red, Magenta, or turned off entirely.

Color Change Kits: White, Ivory, Brown, Almond, Light Almond, Black, Grey

Custom laser engraved buttons are available for both the Scene and House Status Switch.

Expand Your Benefits with a Home Control System

When HLC is used in conjunction with an HAI Omni or Lumina home control system, lights can be scheduled by sunrise/sunset, motion, or event. Lights can be accessed and controlled by telephone, Internet, or Touchscreen.

Single Room Lighting Control, with No Programming.

For an easy to set up, fully scalable lighting control kit, use Lamp Modules, Scene Switches in Table Top Scene Switch Cradles, and the HLC Scene Switch Remote Control.

This stand-alone application is perfect for home theaters, great rooms, master bedrooms & baths, and outdoor lighting.

All HAI Lighting Control Products...

- use Generation II UPB™, a digital communications standard for lighting and home control that ensures superior reliability.
- can be used in new and existing homes with standard electrical wiring.
- are UL Listed.
